

Shaping the Future of Heritage in Canberra

Approachable, experienced team with deep knowledge about the ACT and beyond.

GML Heritage Canberra is a multidisciplinary team of heritage consultants, led by Director and Principal Rachel Jackson. Since the Canberra office opened in 2006, the team has delivered hundreds of heritage projects for national, Commonwealth and local heritage places in the ACT and beyond.

Delivering an integrated heritage management approach, the team offers a wide range of services including First Nations heritage, built heritage, landscape heritage and archaeology. They listen deeply and understand how to assess and manage places for their heritage value at all levels. The Canberra team is particularly renowned for its knowledge of Australian Government heritage management requirements, providing heritage services for Commonwealth departments and agencies. Clients include the Department of Defence, Australian War Memorial, National Capital Authority, Australian National University, Old Parliament House, Department of Finance, Department of Infrastructure and ACT Government directorates.

With a client-focused and professional approach, the Canberra team stays up to date through industry engagement, ongoing teaching, learning and research.

“It is a pleasure to work with GML. They are passionate and knowledgeable about Canberra, deliver clear and thoroughly researched work and reliably meet deadlines.”

Major Projects Canberra, ACT Government

Services

The Canberra team specialises in the following areas:

- **First Nations and Community Heritage**

We work with Traditional Owner organisations and other First Nations people to understand cultural values and develop cultural heritage management plans and interpretation plans, which respect First Peoples' cultural heritage and align with legislative requirements.

- **History**

Our professional historians bring new perspectives to places through evidence-based research and analysis that reckons with our past.

- **Archaeology**

Our experienced archaeologists offer comprehensive archaeology services including site assessments, permit applications, approvals, excavations and reporting.

- **Built Heritage**

Our people deliver urban and built heritage advice, assessments, plans and reviews. We balance conservation with development, alongside contemporary design and today's requirements, to support quality decision-making that is clear, credible and consistent.

- **Landscape Heritage**

We provide insights into how and why landscapes have been modified through time. We help clients to understand, manage, revitalise and conserve cultural landscapes, parks and gardens.

- **Interpretation and Design**

Our heritage experts and designers work together to imaginatively tell the stories of historic places and landscapes.

- **Local to Global Heritage**

We are trusted to understand and apply various listing criteria and recognise community values and perceptions in relation to heritage management practice.

- **Climate Heritage**

We combine built heritage and sustainability expertise to assess a place's heritage values, identify a wide range of risks, and develop policies and guidelines to manage them.

People

We believe that cultural heritage is key to building a prosperous, resilient, and sustainable society.

Our experienced team in Canberra would be happy to discuss your heritage obligations and questions.
